Device at Hill Hearing: Bug'or News Transmitter?

By Mary Russell Washington Post Staff Writer

A "sophisticated transmitter" hearing room of the House vice. Foreign Affairs Committee.

have been intended as a "bug." Or it may simply be a pocket transmitter that a broadcaster left behind.

The device was discovered Monday morning lying on a table used by the press when covering committee hearings. It was first thought to be a bugging devices at the Demo-input to film cameras, or by "bellboy" paging device brought into the room by Watergate headquarters last a football field or walking someone accompanying Secre- June. tary of State William P.
